Securly Parent

Over the course of the next few weeks, The Riverside Technology Department will be implementing Securly Parent. Securly Parent is an option for you to be able to view your child's Internet history at school and at home when your child is using their school-issued device. You also will have the ability to pause the Internet at home or block specific websites if you are using the Securly Parent App. If you choose not to use the app, you will receive a weekly email with your child's Internet history. You can opt out any time if you choose. In the near future, you will receive an email from Securly with more information.

In the meantime, you can learn more about Securly Parent, and how to use it, [here](#).
